Navy and Marine Corps Intelligence Training Center (NMITC)

NMITC will consolidate most of the general intelligence training for the Navy and Marine Corps in a single building to be constructed at FCTCLANT, Dam Neck, VA. Intelligence training now conducted at FITCLANT in Norfolk, NIPSTRAFAC at Key West, AFAITC at Lowry AFB, and LFTCLANT in Little Creek will be combined in NMITC. The consolidation is expected to save as much as \$1.0M. annually in PCS and associated personnel costs, increase student throughput to 675 per year, and improve the quality of intelligence training.

During 1983, architectural plans for NMITC reached the 100% design stage and Congress accelerated construction funding from FY86 to FY84. A working group of NMITC participants convened in October at Dam Neck to plan for a ready-for-training date of 7 July 1986. Atlantic Naval Facilities Engineering Command solicited NMITC construction bids in November in anticipation of ground breaking for the new facility in March 1984.
